The action brought by the Ford Motor Company is based totally on trademark infringement and bad faith.

- The UNITED STATE PATIENT AND TRADEMARK OFFICE shows that Ford Motor Company does NOT own the trademarks for the following:  
4fordparts  
4fordtrucks

See attached USPTO FORMS.

Since Ford does not own the trademarks for the above two domain names Ford does not have the right to claim trademark infringement.

Since the USPTO shows no trademarks on these domain names there can be no trademark infringement or bad faith on the plaintiff's part.

Also the two names above were immediately turned over to Ford and since these sites were never developed in any way Ford has not lost one customer or sale because these sites.

Since no trademark violations occurred and no bad faith can be shown there is no grounds for this action.

We ask the court for relief from this lawsuit.

Thank you
